List of Figures

Figure A. (1) Lamp bearing both a cross and a full inscription in praise of the savior. (2–3) The inscription bears also the name of Allah in Arabic script (from the Jerusalem Ophel), suggesting the addition of short strokes to the letter “O” on the front (left side).	3
Figure B. (line 1) lamps with blister-, cone-, and lump-shaped handles; (line 2) various tongue-shaped handles with horse-shaped projections; (line 3.2-5) various duck-/slipper-shaped handles; (line 4) loop-shaped handles.	4
Figure C. Six-armed cross on: (1) a lamp from Yavneh, second part of the Roman period (Sussman 2017, lamp 1484); (2) a lamp of unknown provenance with a cone-shaped handle and a hunting scene along the shoulders; (3) a Samaritan-type lamp of the Late Byzantine–Early Islamic periods, displaying a six-armed cross on its right and left shoulders (of unknown provenance).	6
Figure D. Lamp decorated with an orant on the nozzle and a cross within a circle surrounded with short strokes (rays) on the shoulders; the handle features a pair of arches resting on the base. Early Islamic period (Sussman 1980).	7
Figure E. Decorated almond-shaped bases: (1) from Sidon (7th century CE); (2) applied decorations on vessels from Tiberias (De Vincenz 2008); (3) lamps with tongue-shaped handles.	7
Figure F. Samaritan lamps with a shrine: (1) Late Roman-Byzantine period showing a shrine and scrolls within the Holy Ark; (2) a common depiction of a breastplate or table in the temple; (3) lamp Type ISM5 with scrolls from the Early Islamic period.	8
Figure G. Lamps decorated with an Ionic style column within a shrine (the channel) (1) Jerash-Type ISM12 (6th-7th centuries CE); (2) Duck-shaped Type ISM13 (13th-15th centuries CE); (3) vertical-stroked column on a triangular base, ISM3 (First Islamic period); (4) four vertical lines, ISM11 (Second Islamic period). A well-illustrated “channel” transformed into a shrine (niche or Qibla) appears on Jerash Lamp-Type ISM12 from the 6th–8th centuries CE. Both types of lamps (without a “channel” [Figure G.1] and with one [Figure H]) had short strokes, or rays, depicted above the vault over the wick hole. The strokes that appear on lamps without a channel at first seem to be part of the shoulder decoration (Figure G.1), but there is a freestanding vault above the wick hole that is “supported” by the Ionic-style column. The same vault appears on lamps with a channel; in both cases they are resting on circles functioning as bases. Three registers appear along the rest of the “nozzle” and in the rear: short strokes along the circumference, an arcade along the walls of the shrine (channel) supported by the same circles functioning as bases, and a zigzag line from the middle to the front. The arcade is part of the pattern around the filling hole in the rear, The zigzag line in the channel seems to be a pattern that appeared beside sacred structures (see text referring to the arcade lamp, Type ISM11).	9
Figure H. Jerash-Type ISM12, with a channel and vault above it.	10
Figure I. (1) Samaritan Lamp-Type ISM5 (2-4) Lamp-Type ISM11 with strokes, a trident, or patterns with the letter W or Hebrew ו or the name Allah; (5) Phoenician type decorated with a cross; (6) northern late Byzantine-Early Islamic chain of intersecting lines; (7) palm branch or candlestick, five branched menorah facing the filling hole and Christian symbols on shoulders; (8) lamp with a fish (Sussman 2017: 256, Fig. 196); (9) lamp with a candle; (10) lamp with a plant, Type ISM10.	11
Figure J. Lamps with cone- and tongue-shaped handles, covered with different patterns.	12
Figure K. A small-sized candlestick lamp with a stylized bird and a fish facing radial strokes, from Gezer (Macalister 1912, Tomb 156).	12
Figure L. Doves/pigeons: (1) good quality; (2) stylized; (3) a horned quadruped. The traditional three patterns depicted on each shoulder was generally used throughout the Islamic period (however not on lamps ISM12 and ISM13). A few new floral patterns, such as a pair of cedar trees or another plant with feather-like blossoms, were among the patterns inside the medallions.	13
Figure M. (1) carpet woven by children in Egypt, displaying dove-cotes, palm trees, and doves; (2) a fragment from the ancient synagogue at Susiya—a horned quadruped (gazelle) next to a palm tree, with a cluster of dates or a type of grape that grows in the Hebron region (excavation of the late Zeev Yeivin).	14
Figure N. Lamp #3635 from Kh al-Mafjar, decorated with stylized hanging birds.	15
Figure A. Blister-, lump- and cone-shaped handles (from left to right)	23
Figure 1. (1) #3292 from Bet She’an; (2) from Ashdod Area A; (3) #3292; (4) #3318 from ‘En Besor.	24
Figure 2. (1) Lamp 49.1546 with wing-shaped handle, of unknown provenance; (2 and 3) lamps from Zuwata, near Samaria.	25
Figure 3. Lamp #3319 from ‘En Besor, decorated with a scroll pattern.	26
Figure 4. (1) lamp from Horbat Bira (Avissar 1997, fig. 4:3); (2) lamp #3323 of unknown provenance; (3) of unknown provenance; (4) Jerusalem (Sussman 2017, fig. 68:2).	26
Figure 5. Channel decorations	27
Figure 6. (1) lamp #3327 from Tell en-Nasbeh; (2) lamp #3331 from Bet She‘arim (Avigad 1971, pl. LXXI:47); (3) lamp #3332 from Kh. el-Minyeh.	31
Figure 7. (1) lamp #3338 from ‘Ein Hanniya (Ain Hanina) (Baramki 1934); (2) section of lamp #3337; (3) lamp #1605 from ‘Ein Yabrud (Sussman 2017, type IIIb13, 5th century CE).	34
Figure 8. (1) lamp #3339 from Tiberias; (2) lamp from Gush Halav (pl. D:8).	34
Figure 9. (1) lamp #3341 from Ramat Rahel; (2) lamp #3342 from Tiberias.	36
Figure 10. (1) patterns in the channel; (2) Samaritan lamps from Kafr ‘Ara (Sussman 1976, fig. 3:3).	38
